OVERVIEW OF PLATFORM 2027

- The purpose of this platform is to provide persistent spaces for communities of different kinds across South Africa to collaborate and interact

- No political parties will have access, but a significant objective is to facilitate and empower citizens to put pressure on the state / politicians to implement the democratic will of the people

- For groups of people and their shared activities I have used the term “Community” : these may be - theme-based or location-based or both.

- Most of the overarching entities involve themes and or locations: both of these involve nested hierarchies: for example, a location-based community could be situated in Western Cape (province) → Garden Route District Municipality (district municipality) → Sedgefield (local municipality); a theme-based community could be located at the national level - such as “Human Rights”; we could also have a community: “Garden Route Climate Change Community” which would be both location- and theme-based

- Organisations are also “communities” that can be both theme- and location based.

- Courses / Trainings (these can be technically lumped together as “courses” and can include online webinars and in person workshops) and Campaigns constitute more short-lived “communities”

- All of these can be served by what I am calling for development purposes “Circle Modules”

- Ultimately, as they evolve some communities may need additional custom services (see below) and extensions of the existing ones

- By abstracting the commonalities at the outset one prevents unnecessary duplication of effort, improves code quality, reduces maintenance etc

- Users will be able to:
  - Join 1 or 2 communities linked to where they live
  - Request to join theme based communities
  - Request to start a community of either or both types
  - The details of these use cases still need to be defined

- Admin users can create all kinds of communities at all levels
- Admin users will be able to invite selected persons to “seed” communities (community members will be able to vote for their admins after the community involved has existed for a set period)

ORGANISATION
Circle 1

COMMUNITY CIRCLE for a location

COMMUNITY CIRCLE for a theme

COMMUNITY CIRCLE for a campaign

COMMUNITY CIRCLE for a course

REQUIRE ALL OR SOME OF THESE SERVICES

Store Assets
- Store and display resources
  - files
  - videos
  - links
- Archives for these

Notifications & Announcements
- Emails, Announcements,
- WhatsApp, Telegram
- Newsletters ...

Manage Interaction
- Zoom & Zoom accounts
- Forums - text-based interaction

Manage Media & News
- Video assets, Podcasts, Graphics
- Blogs, News

Manage Users & Subscriptions
- User roles and permissions
- Subscriptions, Free Access
- Fees, Vouchers

Manage Events
- Event Calendars
- Participant notifications & registrations
- Public / Private Online / Hybrid / Offline
- Zoom accounting

Manage Voting - Polls & Proposals
- Set up polls to for collective decision making
- Manage notifications
- Display outcomes

Manage Learning
- Training tools
- Multiple Choice Quizzes
- More ...

Manage Social Media
- Manage the interaction between platform and Social Media via
- APIs
